Profile Summary

I am a Development Lead by profession having expertise in front-end development. I have designed and developed web-based and mobile front-ends with modern, highly interactive UIs using JavaScript along with Angular and Ionic. I'm an enthusiastic collaborator, and a fast learner with creative problem-solving skills, good coding, and excellent communication skills.

Work Experience

People10 Technosoft Pvt. Ltd., Bangalore

Development lead (April 2022 - Present)

Working in the development team to create reusable components for other developers and building packages to handle cross-cutting concerns and empowering developers to focus on business logic. More focused on developing the NPM library to be used across projects.

Associate development lead (April 2021 - March 2022)

Implemented JWT to make the application more secure. Launched a Peer learning program in the team. Presented a talk on Test Driven Development (TDD) at the company Tech Talk. I have taken multiple front-end interviews for the company. Mentoring juniors and team members in technical areas including but not limited to best coding practices.

Senior Software Engineer (March 2020 - April 2021)

Developed an Angular 9 from scratch. Migrated angular.js project to Angular 9. Responsible for the development of WordPress events and blogs for the client. Given Angular 9 training to team members.

Sulopa Technology Pvt. Ltd., Bangalore

Software Engineer (April 2018 - March 2020)

I started my career as a front-end web developer. Within these fascinating 2 years, I got the opportunity to work in a variety of technologies.

- Developed more than 40 fully responsive mobile-friendly cross-browser compatible static websites using HTML5, CSS3, proficiency in Javascript, JQuery, and Bootstrap, and more than 15 websites using WordPress.
- Developed 2 fully responsive web applications using Angular.
- Developed a hybrid mobile application using the Ionic 4 framework, and published in Google play store and Apple app store.
- Was managing 50-plus websites in various hosting environments.

Projects

OLAS: Jobs for K-12 Education System

Generally, this application is about providing employment solutions to Districts/Schools. The school will create jobs and a candidate can apply for a job. They can search by zip code for the availability of jobs nearby. And this application has different portals and the super admin can impersonate another user to the application. I am responsible for:

- Create and maintain user-friendly web pages and optimize web applications for maximum speed
- Mentor junior front-end engineers to make the team more effective and take interviews
- As part of the team, ensure members adhere to our code quality and testing standards. And participate in code reviews.
- Collaborate with back-end developers and web designers to improve the usability

- Actively participate in the scrum meetings and the development activities (coding, documentation, deployment)
- Review business requirements and perform technical analysis of requirements and participate in the estimation process
- Maintain strong coding, compliance, and security standards by following coding best practices
- Participating in the design and implementation of new features
- Build reusable code and libraries for future use
- Building Micro-Frontend component-based architecture for standardized UI elements

Tech Stack: Angular 9, Server-side rendering (SSR), .Net, IIS

Menuadda (Restaurant Management System)

It is a Visual Menu for everyone, One stop solution for all restaurants. An end-to-end restaurant management system that helps you manage and Increase the revenue for sure. We designed the admin dashboard using angular 7 and the consumer application using Ionic 4. I am responsible for:

- Converting prototypes to highly interactive UI
- Writing modular/reusable code
- Integrating UI with backend using REST APIs, JWT, OAuth, Webhooks
- Collaborate with back-end developers and web designers to improve the usability
- Mentoring / coaching Junior Engineers.

Tech Stack: Angular 7, Ionic 4, Node Js, Serverless, Elastic search, Cloudinary image processing, etc.

Periplus(Travel Management System)

Generally, this application is about building itinerary and cost calculation, transport booking, hotel booking, and travel agent booking. I am responsible for:

- Converting Wireframes to highly interactive UI and writing modular/reusable code
- Collaborate with back-end developers and web designers to improve the usability and Integrate UI with the backend using REST APIs

Tech Stack: Angular 5, Node Js, Cloudinary image processing, etc.

Skills

- Time Management, Problem-solving, Creativity, Positivity, Adaptability, Active Listening, Flexibility, Organization
- HTML5, CSS3, Sass, SCSS, Javascript, Typescript, Bootstrap, Angular 2+, Ionic, REST API, Es6, webpack, Redux
- Unit Testing (Karma, Jasmine, Jest)
- Git, Github, Bitbucket, WordPress, SonarQube, Web Hosting, JIRA, Trello, NPM
- Browser caching and storage using indexedDB, localStorage
- PWAs and server-side rendering
- Knowledge of NgRx
- Agile scrum development process
- Software development lifecycle (SLDC) and SOLID principles

Community Contribution
